

THE STRONG FOUNDATION TO BUILD YOUR PROJECT ON SOLID GROUND

## Custom Home

This beautiful home was constructed on a site overlooking the Atlantic Ocean. Site work included ledge removal requiring blasting and the installation of a sewer pumping station. Extensive landscaping incorporating stone walls and terraces complimented the home's natural setting.

The home itself was constructed of the finest materials including bamboo flooring, stainless steel and granite counters, interior field stone and custom showers with glass doors. Special features include a winding staircase with an open ceiling to the second floor, placed within the ceiling is a custom dome. The dome was then artistically painted to resemble clouds and illuminated with the constellations. This presented a wonderful and unique skyscape. In addition a widow's walk was constructed into the rear roofline, overlooking the ocean, landscape, stone terraces and pool.
