

THE STRONG FOUNDATION TO BUILD YOUR PROJECT ON SOLID GROUND

Salve Regina University

O'Hare Academic Center – Science Laboratories

The renovation of these science laboratories was successfully delivered under a design build model. Working closely with the University's facilities staff and department heads a design was created that not only met program requirements but also established a vibrant and positive atmosphere.

Incorporated in the design were new solid surface laboratory counters, mechanical and electrical systems.

Contributing to the vibrancy of this classroom wing was the application of applied finishes. Materials and color schemes were incorporated that brought new life to what in the past was a very stark environment.
